THE OFFICIAL ART BOOK OF

ZERO-SUM: OMEN

DRAFT LAYOUT · v0.4

FOREWORD

Every number in this world is spinning. This book is about the people who live under them.

The Tally began as a question: what would a world look like if luck were a currency everyone could see? Our answer was a city that counts and a ring of lands that remember older ways of counting: thread, karma, contracts and books of the dead.

We built every style from that history. The brass of the Basilica, the scrap of the Remainder Wards, the gaudy charms of the street, the gold leaf of the fortunate few, and the painted, breathing lands beyond the gate.

The Zero-Sum: Omen team

"A WORLD WITHOUT LUCK IS A WORLD WITHOUT LOSS."

Comptroller Lucan Thale

CONTENTS

A ledger of the Tally, as drawn so far.

Page numbers in the corner of each spread. Placeholder stamps mark pass-1 art kept for layout; colour-key and design-figure stamps mark the designed stand-ins.

STYLES

THE FOUR ERAS OF LUCK

Meridian's styles come from its history: the binding of the ledgers, the Rounding, the Deficit. Every street mixes them; every outfit tells you which side of the Zero-Sum Law its owner lives on.

TR 702 → **TR 760** → **TR 850** → **TR 960** → **TR 990** → **TR 1002**

Basilica completed · Ledgerism · Charmpunk · Remainder · Gilded Fortune · Today

CHARMPUNK

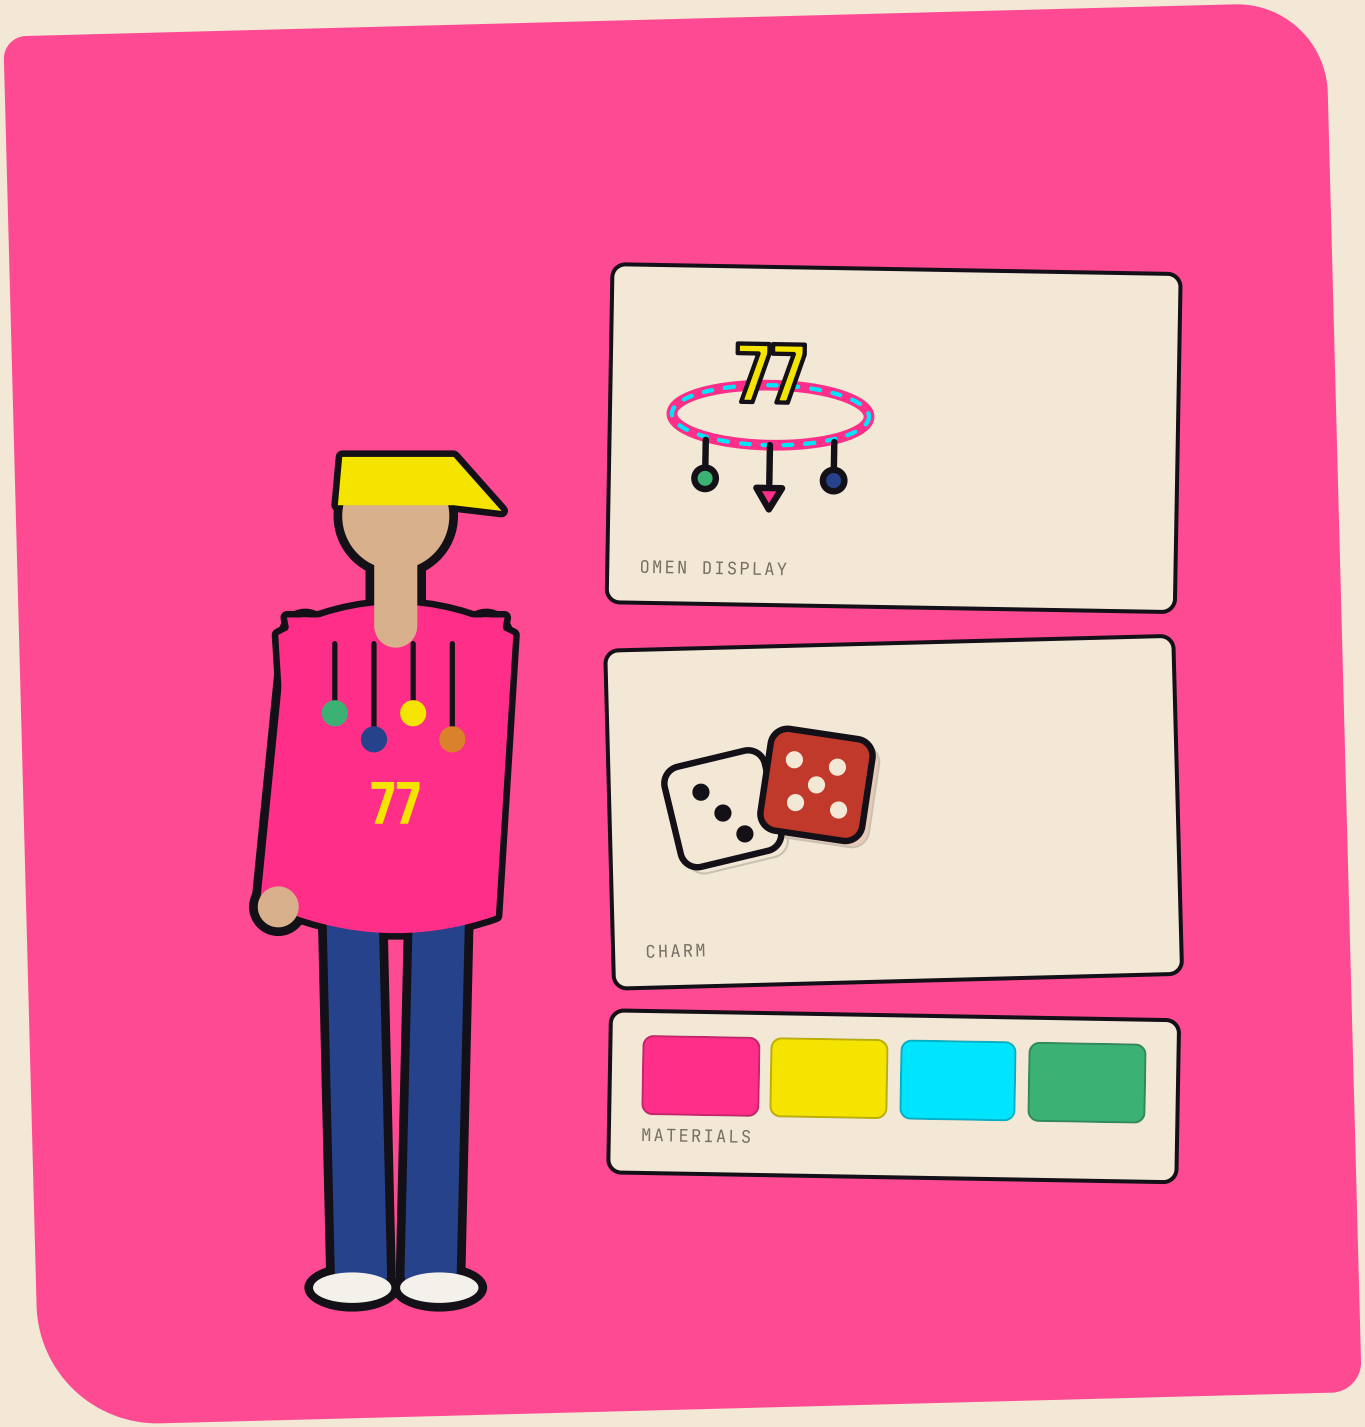

→ LUCK OVER SENSE ←

TR 850→

The street's lingua franca. Every culture's charms worn at once, hand-painted lucky numbers, plastic gold and neon. Charmpunk is loud because luck is a performance: if you can't raise your Omen, you can at least look like you're winning.

ART NEEDED · CHARMPUNK keyframe

- Line-up of 6 Bazaar locals in Charmpunk
- Keyframe: the Charm Bazaar at night, every stall a different culture
- Omen display: gaudy holo-halos, fake Omen projectors

REMAINDER

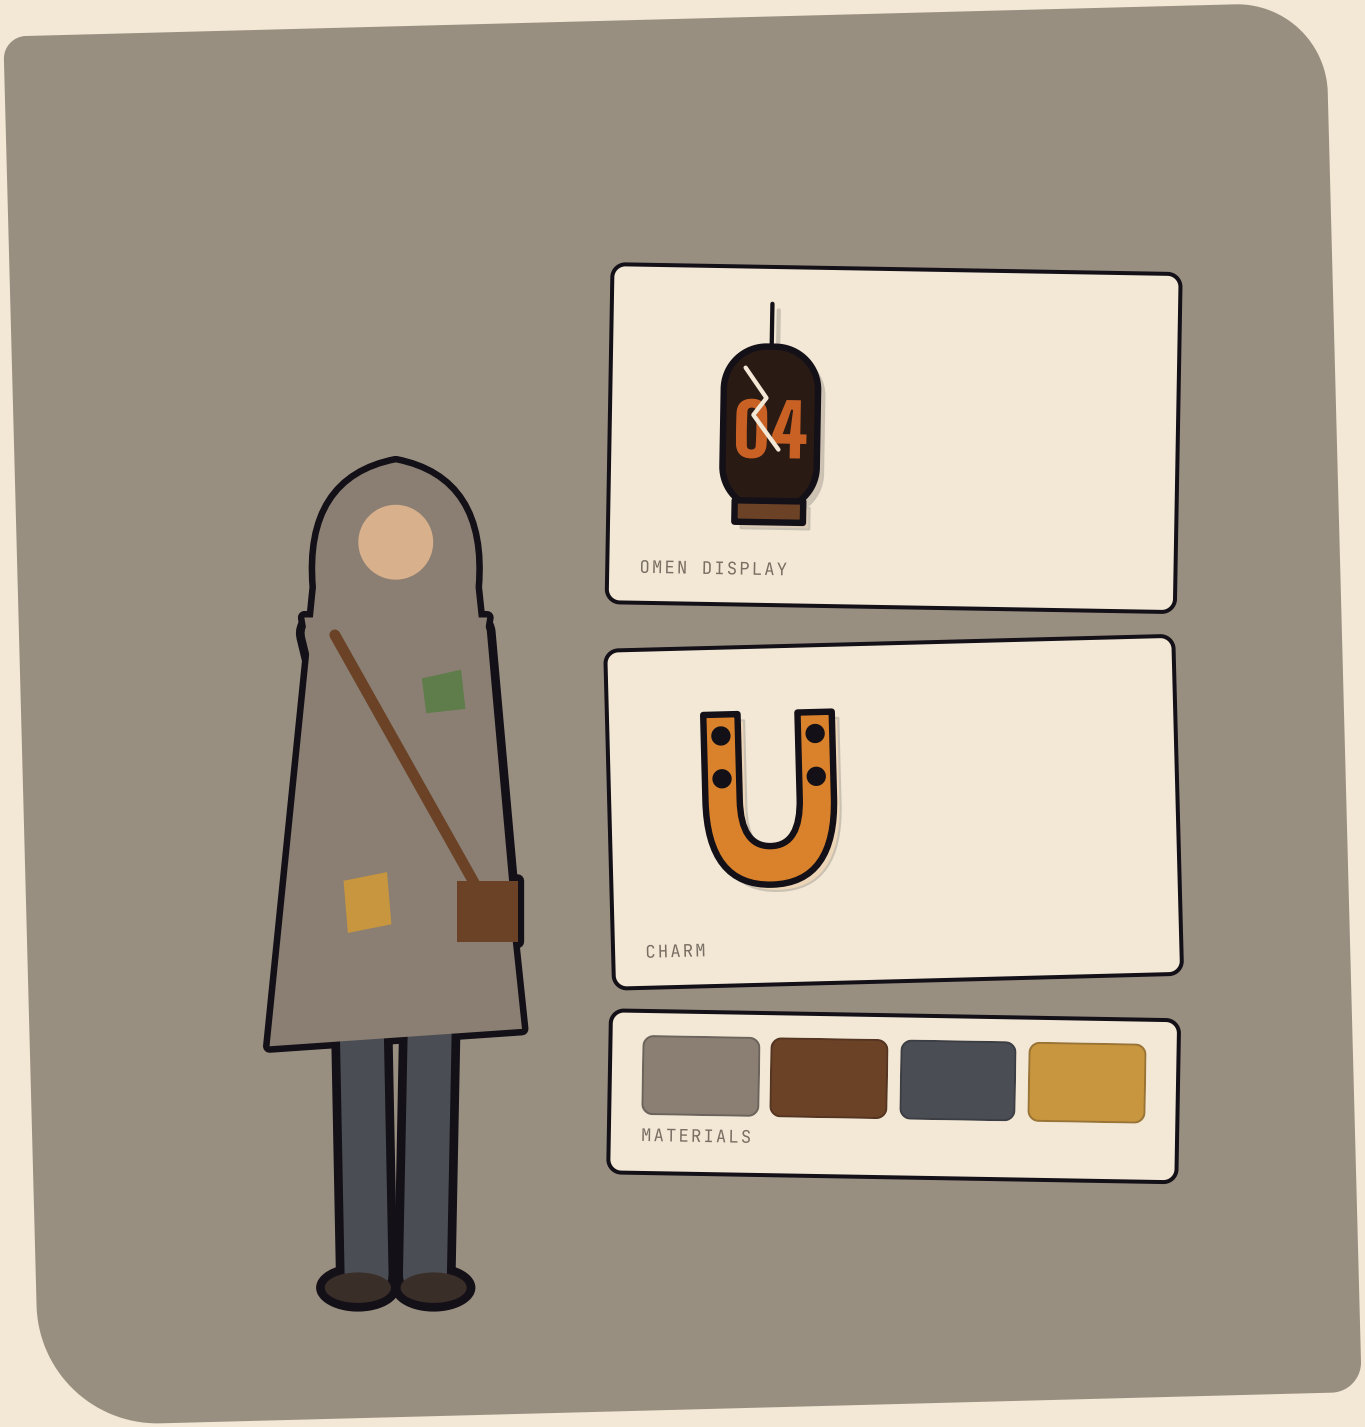

→ SURVIVAL OVER LUCK ←

TR 960→

The style of the Undercity, where Omens run low. Scrap brass from old Basilica parts, patched cloth, salvaged Nixie tubes and rope. Durable, ugly, honest. People hide their numbers here out of shame.

ART NEEDED · REMAINDER keyframe

- Line-up: Remainder Wards residents (mechanic, cook, debt-ridden mother, kids)
- Environment: Rain Alley 9 at dawn
- Omen display: a cracked tube on a cord

LEDGERISM

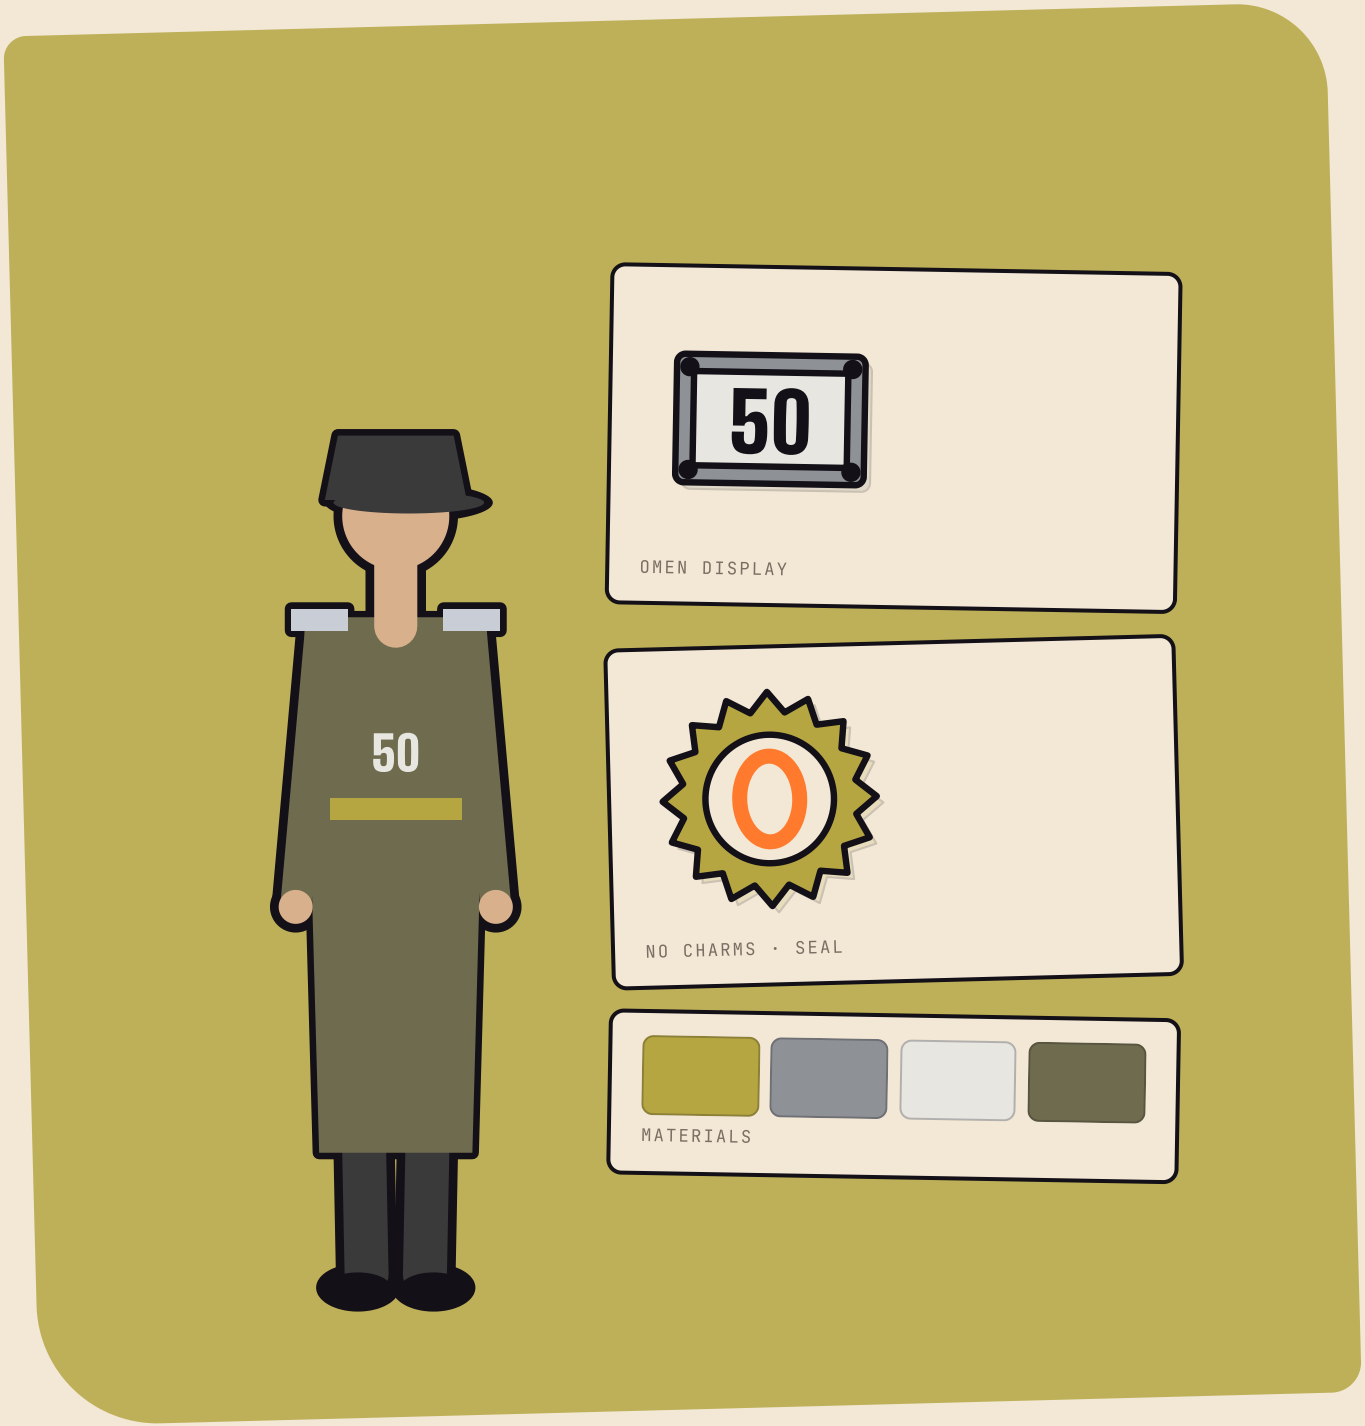

→ ORDER OVER CHANCE ←

TR 760→

The style of the Basilica and its servants. Brass, steel and white enamel; cathedral arches; clockwork; uniforms with stamped seals. Cold, formal and threatening, it says that chance has been abolished and you are being counted.

ART NEEDED · LEDGERISM keyframe

- Line-up: Collectors, Ledger-priests, Basilica clerks, Auditors
- Environment: the Basilica Ring checkpoint
- Omen display: steel numerals, never glowing

GILDED FORTUNE

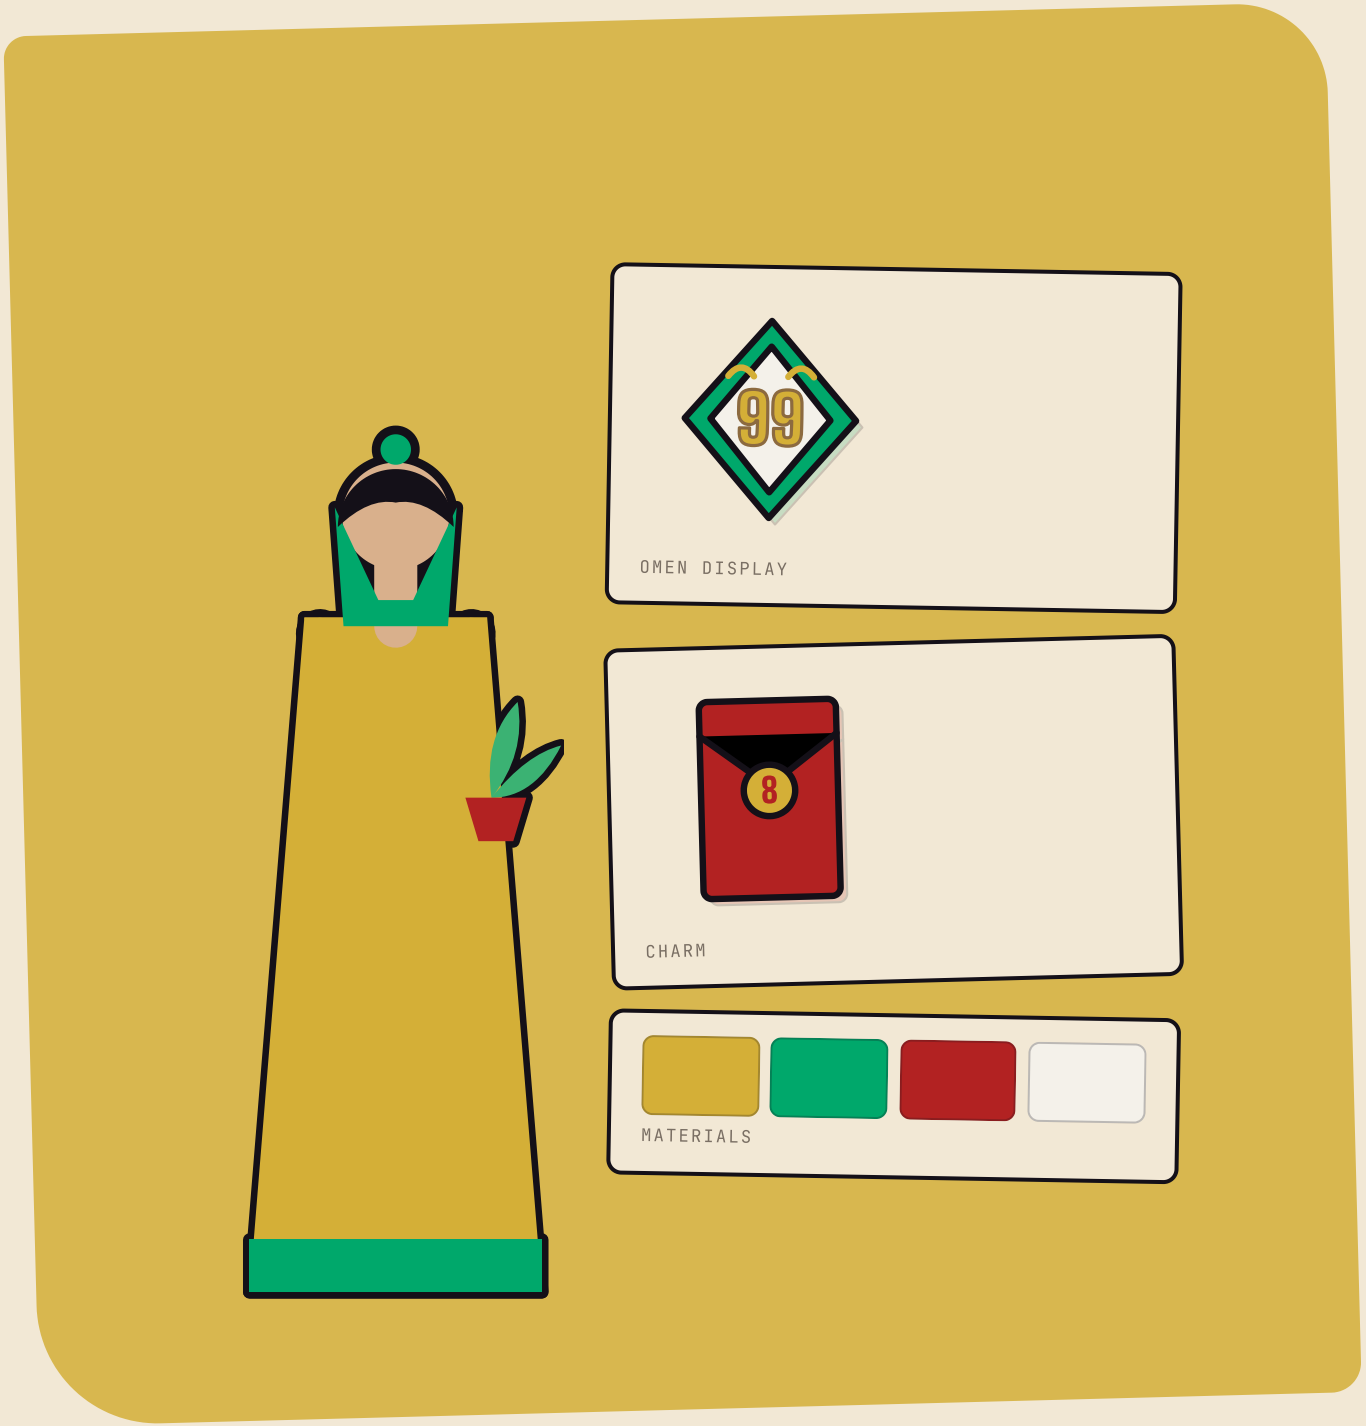

→ FORTUNE AND ORDER ←

TR 990→

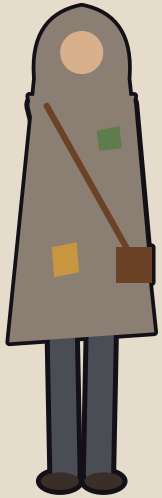

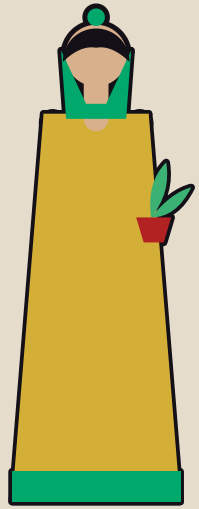

The style of the 99s: old money and Exchange magnates. Real gold leaf, jade, silk and living plants. In Meridian a garden is luck you can see; a bonsai on a balcony is a fortune worn in public.

ART NEEDED · GILDED FORTUNE keyframe

- Line-up: Exchange magnates, heirs, their guards
- Environment: the Exchange Terraces garden-villas
- Omen display: embroidered or gold-leaf numerals

COMPARISON

CHARMPUNK	REMAINDER	LEDGERISM	GILDED FORTUNE
			
Charm 	Charm 	Charm 	Charm 
Omen display 	Omen display 	Omen display 	Omen display 
LUCK OVER SENSE	SURVIVAL OVER LUCK	ORDER OVER CHANCE	FORTUNE AND ORDER

The same three slots per era (a person, a charm, an Omen display), side by side so the eras read as one system. Design figures stand in until the painted comparison sheet (Art Book Production Guide §7, image 3).

THE TALLY

A ring of lands around Meridian's plateau. The upper city is sealed, so to go up you must go around. Each land kept its own ledger of fate before the Basilica bound them all.

Red dotted line: the party's road, from Meridian's Undercity through five lands and back. The Upper Gate needs seven Seal Digits: 1 (Varro), 9, 8, 0, 2, 7, and the seventh is the player's own lucky number.

SEALED

MERIDIAN UNDERCITY

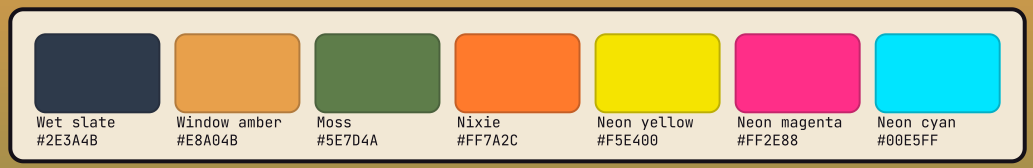

Prologue · cosmopolitan capital · cyber-noir painted city

ACT	Prologue
INSPIRED BY	a cosmopolitan modern capital; the immigrant quarters of every great port city.
LAW OF THE LAND	Debt: everyone owes luck
AUDITOR	Varro Kade, the Ledgerhound
ENEMIES	Debt Hounds · Collectors · Noiselings
LITTLE THINGS	charms of every culture over every door; laundry between tenements; balcony gardens (a garden is luck you can see); cats; hand-painted lucky numbers.
SOUND	rain, Nixie hum, distant Dawn Tally bells, street musicians, Collector sirens.

00–99

ART NEEDED · Meridian Undercity paintings

- Establishing: the Wards at dawn after rain, the Basilica's eye at the end of the street
- Battle stage: Rain Alley 9
- District keyframes: Charm Bazaar, Exchange Terraces, Basilica Ring

COLOUR SCRIPT

MERIDIAN · REMAINDER WARDS

Stacked in the drains and cliffs beneath the plateau. The Wards began as workers' housing for the Basilica's builders and became the place where low Omens end up. Remainder scrap meets Charmpunk colour: every door wears a different culture's charm.

What happened here: the Rounding. Every fraction of luck dropped since TR 702 flowed downhill, and so did everyone who lost theirs.

KEY · REMAINDER WARDS

Colour key over the 3D base: overcast dawn after rain. Slate, ochre and moss walls, warm windows, every culture's laundry, the brass Basilica at the end of the canyon. Nixie orange, magenta and cyan live only on the signs.

Pipeline stage 1b · colour key. Perspective, scale and light are solved in 3D first (see the pipeline page). Stage 2 paints over this; stage 3 is the artist's overpaint.

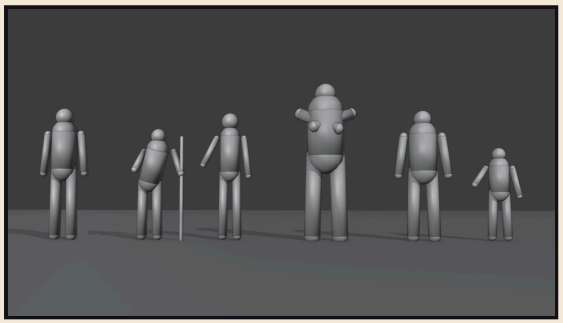

LINE-UP · REMAINDER WARDS

Six locals, shoulder to shoulder, slightly low camera, over the district painting. Ages, builds and origins vary; every outfit is evidence of the Wards' economy.

ART NEEDED · Remainder Wards line-up

- Brass-scrap mechanic (Remainder)
- Grandmother with jade and evil-eye charms (Charmpunk)
- Teen dice-gambler (Charmpunk)
- Collector in rust armour (Ledgerism)
- Noodle cook with a lemon-and-chilli charm
- Kid with a cracked Nixie-tube necklace (Remainder)
